

EDIX Merino seat saver, treeless saddle

An anatomically shaped Merino fur seat saver, specially designed to cover a treeless saddle seat.

At the back of the Merino sheepskin top, the seat is fitted with velcro straps, which makes it easy to stretch the fur over the leather seat and thereafter to connect the straps underneath the seat.

Due to the specific construction of a wool hair fibre and the distance between the hairs on a sheepskin, an intermediate layer is filled with stagnant air, this enables that a sheepskin naturally has a breathable and ventilating effect. "The natural air condition of wool", warm in winter and cool in summer.

Sheep wool is naturally water-repellent and absorbent. The wool can absorb up to 30% of its own weight of moisture, without the fur feeling wet or clammy.

For the correct maintenance of your sheepskin product please refer to the EDIX fur maintenance brochure on our website.

Performance:

- made of 30 mm merino sheepskin
- strong straps Velcro
- machine washable

The EDIX Merino treeless seat saver is available in black, brown, natural and cappuccino, in the sizes S (50cm), M(52cm) and L(54cm).
