treeless saddle

EDIX® Treeless

Treeless riding reintroduces the way of riding that was performed for many centuries, before the invention of the treed saddle. Therefore, treeless riding is not a novelty, but a different way of horse riding. Due to the treeless saddle, horse and rider experience more mutual feeling, the so-called "close contact", enabling them to develop easily a more refined way of communicating through the rider's position.

A treeless saddle consists of at least two individual components, and the term "treeless saddle combination" would actually be more appropriate. It is the combination of the special saddle pad, including the pressure-distributing inlays, with the two-part superstructure (the saddle) which together ensure ultimate

flexibility across the horse's back. Right there is the strength of the balanced pressure distribution, through the different layers across the maximum surface of the horse's back. It is exactly those soft parts that give the saddle great flexibility in all directions. It goes without saying that your horse will be able to move much more freely because of this enormous flexibility.

The EDIX® treeless saddles and saddle pads consist of high quality materials which, owing to the structure of different layers of flexible materials, together ensure perfect pressure-distributing properties, the so-called EDIX® MPDS: multiple pressure distribution system. Due to this specific construction, the treeless saddles have the unique characteristics of being able to fully adapt to the anatomy of horse and rider.

EDIX® recommends purchasing a treeless saddle as a package, including stirrups with fenders stirrup leathers and a matching saddle with inlays. In order to ensure constant firm fixation, EDIX® recommends a fully elastic girth.

The EDIX® treeless saddles come in different models and sizes. The EDIX® range offers sizes from 12" up to 19", in diversity, dressage and Western style. The different models are available in the colour combinations brown, black and natural, in synthetic materials or genuine leather.

For first advice, free of any obligation, contact one of the official EDIX® saddles dealers. Visit the website EDIX® / dealers for the nearest dealer and contact details. The anatomy of both the horse and the rider play a significant role in choosing the proper size. An EDIX® saddle dealer will guide and advise you before as well as during the purchase process, the testing period and offer comprehensive aftercare for a prolonged period of time. For more information regarding treeless, please visit the website: www.edixsaddles.com/information. If you have any questions, please contact one of the EDIX® saddles dealers or send an email to EDIX® saddles: info@edixsaddles.com.

When you follow the recommended process of fitting, testing, purchasing and aftercare, EDIX® saddles guarantees a perfect fit of your saddle for you and your horse to enjoy for many years.

EDIX® Amigo

A beautiful completely treeless all-round children's saddle, the EDIX® Amigo made of fine English leather with knee rolls of soft leather and wool-filled soft leather panels. The children's saddle is complete with matching aluminium stirrups, stirrup leathers and a felt pad, finished with an underside of synthetic wool. The use of distinctive leathers and contrasting white stitching, gives the saddle a refined and beautiful appearance.

A treeless all-round saddle where the construction is especially designed to suit children and ponies. A lovely saddle for the sporty young rider who dares to take a jump course, but also likes to go for a pleasure ride. When a young rider is acquainted with treeless riding at an early stage, it helps the young rider develop a balanced and independent seat and An advantage is that the young rider learns the importance of communicating through the seat.

This all-round saddle is very similar to a traditional treed saddle, yet it is a treeless saddle due to the lack of rigid tree. Only the pommel is made of a narrow metal, but still flexible plate. This serves to keep the saddle in shape and the withers free of pressure. This specific construction allows the saddle to adapt perfectly to the anatomy of the pony as well as to the rider. The leather billets and the safety hook for the stirrup leathers, complete the EDIX® Amigo.

The EDIX® Amigo felt pad provides pressure relief of the spine and the underside is finished with synthetic wool. The F.R.A.® supergirth is optional and its 100% elasticity ensures a rock-solid fixation.

EDIX® saddles advises you to buy the proposed treeless saddles complete with substructure (special treeless pad). This to achieve optimal pressure distribution. For more information see the extensive EDIX® documentation, which can be downloaded from our website: www.edixsaddles.com/downloads.

The EDIX® Amigo children's saddle is available in the colors brown and black and in sizes XXS, XS and S.
